Minox-Elcan offers the MLS 200 Jet Sieve for small volumes and test applications. The Minox Jet Sieve uses standard 8" sieves, prevents inaccurate results due to screen blinding, and dedusts statically bound fines. The MLS 200 is used for all dry materials from 20 to 1,000 micron. The Jet Sieve is superior for electrostatic materials and on products that are predisposed to blinding. Choosing the Minox Jet Sieve will increase both productivity and cost savings. For more information on the MLS 200 Jet Sieve and other machines contact sales@minox-elcan.com.
